

Town of York
Conservation Advisory Council
11/16/16 Meeting Minutes

Steel Fuller, Jerry Sturm, David Rose, Amos Smith, Paul MacLean, Dave Nagel, John Morgan, Kirk Richenberg

David Rose led a discussion of York's large-scale solar installation moratorium draft and of solar power in general. Some of the items discussed included the town's substations (a substation map was present), net metering, storage battery use, farmland use, the Avon moratorium, price per acre for solar use, Farm Bureau recommendations, outside hedge funds buying up town farmland, the solar panel presentation for Wyoming County, and the need for additional information.

Also included was a discussion of the town's protection for its other natural resources.

It was determined that more information was definitely needed and that an attempt will be made to bring the Wyoming County presentation to our county (by Amos, Dave, and possibly one additional individual).

Respectively Submitted,
Dave Nagel
